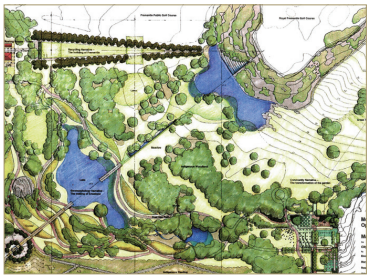
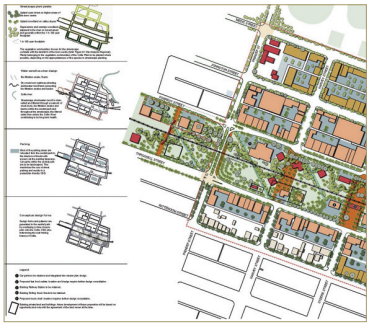
master planning





Master planning is the broad-scale organisation of a site based on a proposed program to allow for successful detail design. A good master plan expresses a design concept and accommodates the development of the concept without compromising the integrity and structure of the site and context.

Our Services

- mapping and analysis of existing site conditions
- site appreciation and opportunity identification
- community and stakeholder consultation
- interdisciplinary liaison
- development and design of master plan documentation
- preparation of reports and style manuals
- preparation of master plan presentation graphics
- opinions of probable cost

Our Approach

Ecoscape focuses on a site and beyond its boundaries to develop a master plan that considers the environmental and social context. Our understanding of spatial parameters and environmental processes, together with strong design principles and community consultation, allows us to create a site-specific master plan.

Our Experience

- Faulkner Park Future Options, City of Belmont
- Melville Landscape and Playspace, City of Melville
- Collie Central Business District Redevelopment, Shire of Collie
